3 LITRES

KEY FEATURES

GLASS COATED HEATING ELEMENTS

Scale and sediment build-up on the surface of the element can lead to premature failure. A. O. Smith Glass Coating helps to prevent scale formation and extends the life of the heating element.

HIGH RATED PRESSURE

The water heater has a high pressure withstanding capacity of 95 psi (6.5 bar equivalent to 65 metres water head), which makes it suitable for high-rise buildings.

RUST-PROOF OUTER BODY

Superior quality ABS outer body prevents rusting. The elegantly styled water heater matches kitchen and bathroom décor.

HI-TECH THERMOSTAT & CUTOUT

It has a superior Thermostat. In case a fault occurs and the water temperature exceeds the preset level, the Thermal Cutout cuts off the power supply to assure safety.

LONGER WARRANTIES

5 years warranty on inner tank. 3 years extended warranty* on heating element.
